

Public Economics in Theory and Practice

Professor	Room	Phone	Office hour
Prof. Dr. Thiess Büttner	LG 6.113	5302-200	by appointment
Dr. Carolin Holzmann	LG 6.120	5302-201	by appointment

Contents:

The lecture provides an introduction in public economics at intermediate level. The course first derives the basic theoretical foundations for an optimal design of public policy. In the second step, the course discusses specific aspects of public policy, such as taxation and redistribution, social security, tax evasion, debt finance, interjurisdictional competition and fiscal federalism and explores practical problems.

Learning Objectives:

Students know how to characterize efficient public policies using microeconomic decision models. They can use this framework to study public policy in a rigorous and consistent general equilibrium context. Students are acquainted with important empirical approaches to evaluate public policies quantitatively. Moreover, they know about options, methods and limits to implement efficient public policy.

Literature:

Hindriks, J., and Myles, G., (2006), *Intermediate Public Economics*, MIT Press, Cambridge

Atkinson, A.B., Stiglitz, J. E., (1980), *Lectures on Public Economics* . MacGraw-Hill, New York

Further literature will be given in the course. Lecture notes are provided on studon.

Dates:

Lecture: Monday 16:45 - 18:15, LG 5.152 (Start: 24.4.2017)

Tutorial: tba.
